Detailed Office Action

Status of the Claims

Acknowledgement is hereby made of receipt and entry of the communication filed 12 July, 2007. Claims 87-93, 95-113, 126-132 and 134-152 are pending in the instant application.

37 C.F.R. § 1.121(d)

The drawings filed 12 July, 2007, have been examined and are acceptable.

37 C.F.R. § 1.98

The information disclosure statement filed 12 July, 2007, has been placed in the application file and the information referred to therein has been considered. Applicants noted that they failed to receive signed copies of the information disclosure statements filed 30 March, 2004, 09 July, 2004, 08 December, 2006, and 22 January, 2007, in the last office action even though they were considered. Signed copies of these documents are again attached to this office action.

Nonstatutory Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not

patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 U.S.P.Q.2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 U.S.P.Q.2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 U.S.P.Q. 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 U.S.P.Q. 761 (C.C.P.A. 1982); *In re Vogel*, 422 F.2d 438, 164 U.S.P.Q. 619 (C.C.P.A. 1970); and *In re Thorington*, 418 F.2d 528, 163 U.S.P.Q. 644 (C.C.P.A. 1969). A timely filed terminal disclaimer in compliance with 37 C.F.R. § 1.321(c) or § 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 C.F.R. § 3.73(b).

Claims 87-93, 95-113, 126-132, and 134-152 stand rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-30 of U.S. Patent No. 6,710,173. Although the conflicting claims are not identical, they are not patentably distinct from each other. The claims of the '173 patent are directed toward nucleic acids encoding a modified HIV-1 envelope glycoprotein. The claims in this patent do not specify if the nucleic acid of interest is DNA or RNA. However, it would have been *prima facie* obvious to one of ordinary skill in the art to employ a DNA form of the nucleic acid since this would enable one of ordinary skill in the art to

readily manipulate the nucleic acids so they can be readily introduced into different cloning vectors and expression vectors. Applicants have indicated that a terminal disclaimer will be filed when allowable subject matter is identified.

35 U.S.C. § 101

The following is a quotation of 35 U.S.C. § 101 which reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

Claims 105-107, 110, 144-146, and 149 are rejected under 35 U.S.C. § 101 because the claimed invention is directed toward non-statutory subject matter. The term "cell" encompasses any cell target carrying the vaccine vector. Thus, patients that have received the vaccine vector will comprise these cells. The scope of the claim, therefore, encompasses a human being, which is non-statutory subject matter. As such, the recitation of the limitation "isolated" or "purified" or "non-human" would be remedial. See 1077 O.G. 24, April 21, 1987.
